

# WATER, WASTEWATER & STORMWATER MASTER PLAN PROJECT UPDATE

## Project Scope

The Water, Wastewater and Stormwater (W/WW/SWM) Master Plan is a comprehensive plan for the growth-related infrastructure requirements for the City of Hamilton. The Master Plan consists of a review of growth projections, servicing policies, design criteria and completion of public consultation and servicing strategy development and evaluation under the Municipal Engineers Association (MEA) Class Environmental Assessment (EA) Master Plan Process. The population and employment projection inputs are developed by the City Planning department under the Growth Related Integrated Development Strategy (GRIDS) 2 process and will consist of population, employment and densities within existing areas (infill / intensification) and new Greenfield growth to 2051. Visit [GRIDS 2 and Municipal Comprehensive Review](#) (MCR) for more information. At the conclusion of the Master Plan, a key deliverable will be a detailed W/WW/SWM Capital Program, complete with project descriptions and capital costs. This program will form the basis for the next Development Charges (DC) update in 2022.

## Planning Process (GRIDS 2) Data Delivery

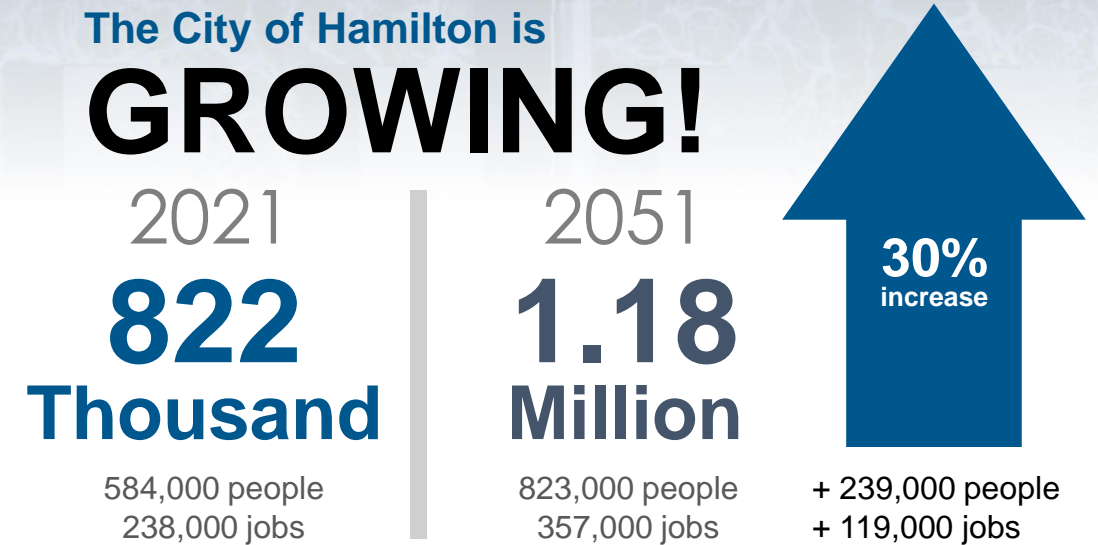

Data was provided by the GRIDS 2 Process in June 2021 that updated the planning horizon to 2051. Project analysis and modelling based on the population projections and planning scenarios is underway. The Planning scenarios that have been identified are not yet approved by council. A Council and Committee meeting is planned for October 2021 that will identify whether an Urban Boundary Expansion is required. This decision will be based on a detailed review of the Lands Needs Assessment and public input from the distribution of a City-wide Hamilton Resident survey. The Master Plan preliminary scenario modelling and draft results will potentially be impacted by this decision.

## Project Contact

Please visit the [project website](#) for more information. If you wish to submit comments or would like to be added to the project mailing list for future project notifications, please contact:

**Bhajan Sarker, P.Eng.**  
 Senior Project Manager, City of Hamilton
